
PRESIDENT'S MESSAGE

Dear Members,

Greetings from TNOA!

I am very happy to see the JOJS for this year is being brought out by the team headed by Dr A Suresh Kumar and ably assisted by Dr TR Ashok and Dr R Karu Shanmuga Karthikeyen. They have put in great efforts to contact all the heads of the institutions in getting the articles and reviewing it with a very academic and efficient team. They are also coordinating with the team for indexing this journal which is the need of the hour to improve the quality of our journal. This will also encourage the authors to submit their manuscripts to our journal.

To index our journal lots of people have put in their efforts before, but they could not realize the goal due to so many reasons. The main difficulty in getting our journal indexed is the lack of submission of enough articles to our journal.

There is no dearth of scientific work in our state, and they are of the highest quality which is evidenced by the paper submission and the presentations happening in our conferences. Hence, I take this opportunity to request all the HODs and the professors of all the institutions to encourage their students and fellows to submit their manuscripts to our journal. I am sure our JOJS will be indexed soon.

Long live TNOA!

Prof V Singaravadivelu

MS Orth, PhD
President, TNOA
